

Process *the Harvest*

A one-page working ledger — print it, clip it up, fill it in pencil.

This is the work of keeping — ferment, cure, extract, smoke. These seasons are ruled by curves and equilibria, where a missed weight or a warm afternoon changes everything. Written down, every batch becomes repeatable.

BATCH LOG

STARTED	BATCH / WHAT	WEIGHT IN	SALT / RATIO	TEMP	READY	RESULT

Three rules for this phase

1. Weight in and weight out — the loss is the truth.
2. One variable per batch, or you'll never know why.
3. Label the jar the day you fill it.

SC *The Steading Codex* — Field Journals for the Working Homestead

The three journals for this phase: The Culture Archive · Plant Apothecary ·
Smoke & Salt
