

Seed Inventory Sheet

Know what you have before you order more.

Before the next packet goes in the cart, take stock. A seed inventory ends the double-buying, flags what's getting old, and turns a shoebox of envelopes into an actual plan.

A ten-minute germination test

- Ten seeds on a damp paper towel, folded into a bag, somewhere warm
- Check on the packet's days-to-germinate
- 6+ sprouted → sow as normal · 3 – 5 → sow thick · under 3 → compost it and reorder
